Diamond Marine Eye Cream

Enhances skin firmness
Reduces puffiness and dark circles

PRODUCT DESCRIPTION

Cosmetic Solutions Diamond Marine Eye Cream is scientifically formulated with Marine Enzyme, Collagen and Vitamins A, C and E to inhibit the collagenase that destroys the skins collagen network, resulting in a healthier, younger looking orbital region. Diamond Marine Eye Cream instantly creates a luminous and radiant complexion, while light-reflecting diamond particles diffuse the shadows caused by wrinkles, optically diminishing their appearance. The transparent color-correcting formula revitalizes the appearance of dull, sallow skin leaving it with a radiant glow.

KEY BENEFITS

- Reduces puffiness and dark circles
- Repairs and protects skin from sun and the environment
- Enhances skin firmness

Each color specifically targets the eye area and contributes to the eye in a unique way.

- Violet color: Specifically for under eye shadows, and to brighten darker complexions.
- Pink color: Specifically for adding a red bloom to the complexion.
- Aqua Color: Decreases redness and dark circles, enhancing whiteness, evening pigmentation and increasing luminosity.
- Green Color: Specifically for decreasing redness, evening pigmentation and increasing luminosity.

SCIENCE

Cosmetic Solutions Diamond Marine Eye Cream is a powerful inhibitor of Matrix Metalloproteinase activity, mimicking glycosaminoglycans, thus supporting the transdermal collagen matrix while increasing the depth of hydration, moisture retention, and skin firmness. Diamond Marine Eye Cream is formulated to convert invisible UV light to blue light. As we age, our skin dramatically loses its ability to fluoresce blue and green light. This lack of fluorescence leads to a prematurely aged and unhealthy appearance. The advanced diamond core technology emits and scatters both blue and green light, emulating the emission pattern of young, healthy skin. When applied to skin, particles manipulate incident light by converting invisible UV light and selectively scattering favorable blue and green light. The particles settle in the wrinkle and subtly illuminate a blue glow which decreases the appearance of shadows, wrinkles, pigmentations and discolorations.

DIRECTIONS

Apply to ring finger and tap gently over entire eye area.

INGREDIENTS

Purified Water, Cetearyl Alcohol, Isopropyl Myristate, Glycosaminoglycans, Simmondsia Chinensis (Jojoba) Seed Oil, Squalane, Cyclomethicone, Dimethicone, Soluble Collagen, Polymethylsilsesquioxane/benzimidazole diamond copolymer, Aloe Barbadensis Leaf Extract, Tocopherol (Vitamin E), Retinyl Palmitate, Panthenol (Calcium Pantothenate), Allantoin, Polysorbate 60, Phenoxyethanol, Ethylhexylglycerin.
